

1. Introduction

1. Thesis environment
2. Visual based localisation
 1. *Use case*
 2. *Methods*
 3. *Data involved*
3. Thesis outlines

2. Visual based localisation

1. Data representation
 1. *Visual data*
 2. *Local features*
 3. *Global features*
 4. *Semantic & hybrid features*
2. VBL methods
 1. *Image retrieval for localisation*
 2. *6-DoF camera localisation*
 3. *Cascading methods*
3. Localisation under challenging conditions
 1. *Appearance changes*
 2. *Cross-appearance localisation*
4. Data heterogeneity
 1. *Optical information*
 2. *Geometric information*
 3. *Semantic information*
5. Discussion

3. Side modality learning for large-scale visual localisation

1. VBL as an image retrieval task
 1. *Features aggregation*
 2. *Similarity research*
 3. *Candidates re-ranking*
2. Learning an image descriptor for VBL
 1. *Descriptor architecture*
 2. *Learning framework*
3. Missing modality as auxiliary information
 1. *Side information learning*
 2. *Depth from monocular*
4. Joint learning of image descriptors and auxiliary modality
 1. *Intuition*
 2. *Preliminary results*
 3. *Disjoint learning for common representation*
5. Experiments and results
 1. *Datasets*
 2. *Implementation*
 3. *Advantages over existing methods*
 4. *VBL in challenging conditions*
6. Data heterogeneity and availability
 1. *Modalities fusion*
 2. *Handling multiple modalities*
 3. *Dealing with asymmetric data*
7. Discussion

4. Refining visual localisation with learned geometric clues

1. Review of 6-DoF camera pose estimation methods
 1. *Relative pose estimation*
 2. *Absolute pose estimation*
 3. *Learned approaches*
2. Pose refinement based on a learned scene geometry
 1. *Proposed method*
 2. *Dataset*
 3. *Results*
 4. *Comparison of real and learned data*
 5. *Discussion*
3. Improving localisation by combining image geometry with 3D learned clues
 1. *Proposed improvement*
 2. *Results*
 3. *Discussion*
4. Re-localisation at scale with weakly supervision
 1. *Learning geometry from video sequences*
 2. *Outdoor localisation results*
 3. *Discussion*

5. Conclusion

1. Summary of the thesis
2. Contribution
 1. *VBL pipeline from coarse to fine localisation*
 2. *Modality heterogeneity*
3. Future research
